EDUCATION

Northeastern University, Boston, MA **Jan 2026 - May 2028**

Master of Science in Data Science | GPA: 4.0/4.0

- Relevant coursework: Essentials of Data Science, Database Management Systems, Data Warehousing & Analytics, NoSQL

Maulana Abul Kalam Azad University of Technology, West Bengal, India **Aug 2016 - Jun 2020**

Bachelor of Technology in Computer Science & Engineering

SKILLS

Communications & Writing: Explaining technical work to non-expert readers, plain-language summaries of complex findings, procedure and onboarding documentation, clear concise prose, adapting tone to the audience

Social Media & Visuals: Active on LinkedIn; quick to learn Instagram, TikTok, X, and Bluesky conventions. Simple charts and graphics for general audiences (Tableau, Power BI, ggplot2), performance tracking and reporting

Coordination & Operations: Calendar and meeting scheduling, event and session logistics, recurring delivery schedules, cross-team follow-up, reliable follow-through on small repeating tasks

Reliability & Discretion: Five years handling confidential client and regulated financial records; sustained daily delivery without reminders; audit-ready record-keeping

Technical Background: Python, SQL, R, Microsoft Excel and Google Sheets; machine learning and public health survey data analysis; AWS Cloud Data Engineer (2025)

EXPERIENCE

Team Lead / Documentation & Training | Client: CitiBank **Dec 2019 - Mar 2023**

Empaxis Data Management, Noida, India

- Authored standardized runbooks, procedure guides, and onboarding materials that took new hires from no knowledge to independent work
- Translated complex technical processes into plain written instructions used daily by a 10+ person team
- Trained and mentored 10+ new team members, adjusting explanations to each person's starting level of understanding
- Handled confidential client financial records daily under strict access, retention, and audit controls
- Coordinated a 6-person team, tracking recurring deliverables and following up on open items without being prompted
- Produced recurring client-facing reports summarizing daily activity, keeping stakeholders current without being asked

Senior Data Management Analyst | Client: Commonwealth Bank of Australia **Mar 2023 - Sep 2025**

Synechron, Bengaluru, India

- Served as first point of contact for incoming stakeholder questions, answering clearly and cutting response turnaround 30%
- Translated business requirements into clear written specifications that non-specialists and engineers could both follow
- Wrote plain-language incident write-ups documenting findings and corrective actions for every issue resolved
- Reported status to senior leadership on a fixed recurring cadence, flagging risks before they became problems
- Sustained a 99.5% service commitment over two and a half years of daily operations without supervision or reminders
- Ran daily stand-ups and coordinated scheduling and work assignment for a 5-person team

HEALTH & DATA PROJECTS

Social Determinants of Mental Health | CDC BRFSS Survey Data **Mar 2026**

Northeastern University, Boston, MA

- Analyzed a 400K-respondent national public health survey examining how demographic and socioeconomic factors relate to mental health outcomes
- Summarized findings and reported them in plain language to a non-technical audience, with charts built to communicate rather than decorate
- Compared machine learning models to find which factors most strongly predicted outcomes, then explained the result without jargon
- Built charts chosen for clarity over decoration, so a reader could take the main finding from a single image

Restaurant Database Analytics Platform **Apr 2026**

- Produced recurring revenue and activity reports for stakeholders, verifying every published figure against source records before release

Data Warehousing & OLAP Analytics **Apr 2026**

- Structured a 5-table analytical warehouse and produced summary visualizations communicating patterns to a general audience

Streaming Data Collection Platform **Jul 2026**

- Built an end-to-end system moving live record changes into a query-ready analytics layer, with validation at each stage
